

producer for ground and surface water conservation contracts, that would tend to defeat the purposes of the program;

(ii) Refund any program payments received with interest, and forfeit any future payments under the program, on the violation of a term or condition of the contract, consistent with the provisions of § 1466.26;

(iii) Refund all program payments received on the transfer of the right and interest of the producer in land subject to the contract, unless the transferee of the right and interest agrees to assume all obligations of the contract, consistent with the provisions of § 1466.25;

(iv) Implement a comprehensive nutrient management plan when the EQIP contract includes a waste storage or waste treatment facility; and

(v) Supply information as may be required by NRCS to determine compliance with the contract and requirements of the program.

(4) Specify the participant's requirements for operation and maintenance of the applied conservation practices consistent with the provisions of § 1466.22; and

(5) Specify any other provision determined necessary or appropriate by NRCS.

(c) The participant must start at least one financially assisted practice within the first 12 months of signing a contract. If a participant, for reasons beyond their control, is unable to start a practice within the first year of the contract, they can request a waiver from the State Conservationist.

(d) Each contract will be limited to no more than \$450,000.

#### **§ 1466.22 Conservation practice operation and maintenance.**

The contract will incorporate the operation and maintenance of conservation practices applied under the contract. The participant must operate and maintain each conservation practice installed under the contract for its intended purpose for the life span of the conservation practice as determined by NRCS. Conservation practices installed before the execution of a contract, but needed in the contract to obtain the environmental benefits

agreed upon must be operated and maintained as specified in the contract. NRCS may periodically inspect a conservation practice during the life-span of the practice as specified in the contract to ensure that operation and maintenance are occurring. When NRCS finds that a participant is not operating and maintaining practices in an appropriate manner, NRCS will request a refund of cost-share or incentive payments made for that practice under the contract.

#### **§ 1466.23 Cost-share rates and incentive payment levels.**

(a) Determining Cost-share payment rates.

(1) The maximum cost-share payments made to a participant under the program will not be more than 75 percent of the actual cost of a structural practice, as determined by the State Conservationist or Designated Conservationist, except that for a Limited Resource Farmer or Rancher or Beginning Farmer and Rancher cost-share payments may be up to 90 percent, as determined by the State Conservationist or Designated Conservationist.

(2) The cost-share payments to a participant under the program will be reduced proportionately below the rate established by the State Conservationist or Designated Conservationist, or the cost-share limit as set in paragraph (c) of this section, to the extent that total financial contributions for a structural practice from all public and private sources exceed 100 percent of the actual cost of the practice.

(b) Determining Incentive Payment levels. NRCS may provide incentive payments to participants for performing a land management practice or to develop a comprehensive nutrient management plan in an amount and at a rate necessary to encourage a participant to perform the practice that would not otherwise be initiated without government assistance. The State Conservationist or Designated Conservationist, with the advice of the State Technical Committee or Local Work Groups, may consider establishing limits on the extent of land management practices that may be included in a contract.
